

ONLINE SEXUAL EXPLOITATION AND ABUSE

Every half second,
a **child goes online**
for the first time

One in three Internet
users worldwide is
a **child**

There are currently more than **46 million unique images or videos of child sexual abuse material** in EUROPOL's repository

23.4M

Of the **23.4 million** reports of child sexual abuse material, **40 per cent** occurred in 2017 alone

800 million
children use
social media

84 per cent of detected
child sexual abuse materials
and **91 per cent** of videos
are **reported only once**

At any one time, **750,000 individuals** are estimated to be looking to **connect with children for sexual purposes**

CYBERBULLYING

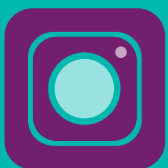

More than **one-third** of young people report being a victim of online bullying

LGBTQI+ youth are nearly **three times as likely** as non-LGBTQI+ youth to be bullied or harassed online. They are also **twice as likely** to be bullied via text message

1 in 3 LGBTQI+ youth has been **bullied online** because of their **sexual orientation** or gender expression

42 per cent of young people experience harassment on Instagram, the highest proportion of any social media platform

Girls are more likely than boys to be both victims and perpetrators of cyber bullying. According to one study, **15 per cent** of teen girls have been the target of abusive online behaviours, as compared with **6 per cent** of teen boys
